

Sustainable and Biodegradable Gadgets

WHO WE ARE

We are the only manufacturer in Europe specialized in the production of sustainable and biodegradable gadgets, able to create products tailored for you.

AGA is a **B.U.** of **Ometec**, a company that deals with the design and production of molds and plastic molding.

After years of research we have found the solution: the collaboration with partner companies, thanks to which an **innovative technology** was born that allows us to create products with an alternative material to plastic, derived from natural sources, able to reduce the impact of CO2 on the planet and environmental pollution.

After two years of experimentation and improvement of the material and combining the **knowledge of Ometec's industrial processes** and the knowledge of innovative materials of the partner companies, we have come to obtain an innovative, sustainable and unique technology in the world.

we are innovation

we are sustainable

we are honest

we are the change

SUSTAINABILITY

We believe it is **time to change**, to invest in innovation and **new ways of realising ideas**.

It is time to raise the ethical and environmental standards of our industry, to focus on products made from recycled materials or from sustainable supply chains. We manage projects while reducing the impact on the environment.

Our mission is to offer you the best: **products that impact people, not the planet.**

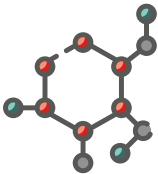

OUR SOLUTION

AGA's solution is GALAFIL, the technology used to produce gadgets made from sustainable materials.

ECOLOGICAL AND SUSTAINABLE

We chose to join the change through the use of **materials** provided by our partners, sustainable, biodegradable and compostable **alternatives to plastic** to reduce environmental impact.

BIOPLASTIC

We use **BioPolymers** in order to make environmentally sustainable materials. This material has the characteristic of being biodegradable on a biological basis.

ECOCIRCULARITY

The sustainable materials used, through **Galafil technology**, do not produce residues harmful to the environment or health, returning to the soil and re-entering the life cycle of the planet, according to the principles of the **circular economy**.

Galafil

Galafil is a technology made in Italy, which allows to make **customized biodegradable gadgets** using natural raw materials.

FROM IDEA TO YOUR GADGET

Aga, the right italian partner to give life to your ideas

AGA is your chance to bring your **ideas to life**, give value to your brand and show its concrete commitment to sustainable goals through a strong and clear message.

Made in Italy, attention to detail and look to the future of **AGA guarantee a very high level of customization.**

Through Galafil technology we can create **eco-friendly** and customizable gadgets.

Aga aims to **give shape to your ideas.**

IDEA
Tell us your idea. We develop it together with you.

STEP
1

STEP
2

GRAPHIC DEVELOPMENT
We give shape to your ideas through graphic representation.

PROTOTYPE
We choose the solution that best suits your needs and proceed to the realization of the prototype.

STEP
3

STEP
4

CO-DESIGN
We take care of all the design phases, from graphic development to prototype.

PROTOTYPE APPROVAL
Once the prototype meets the customer's needs, it is approved and production starts.

STEP
5

STEP
6

PRODUCTION
The printed product is then subjected to different finishing processes until its final stage for production.

FINISHED ARTICLE
AGA aims to give shape to your ideas by maximizing time and costs of realization.
